

# Food Delivery Webpage

This project is a **Food Delivery Website** designed to showcase a responsive and visually appealing food ordering platform. It is built using **HTML, CSS, and Bootstrap 4**.

---

## □ Project Overview

The Food Delivery Webpage provides a clean, user-friendly interface for users to:

- Browse through the food categories.
- Explore menus and offers.
- Learn about healthy eating and delivery options.
- Follow the platform on social media.
- Contact the business through provided details.

It demonstrates front-end web development skills, including responsive design and the use of external libraries.

---

## □ Features

- **Responsive Navigation Bar** with links to all sections (Home, Why Choose Us, Explore Menu, Payment & Delivery, Follow Us).
  - **Hero Section** with call-to-action buttons for viewing the menu and ordering now.
  - **Why Choose Us Section** showcasing key business features with icons and descriptions.
  - **Explore Menu Section** displaying food categories in cards.
  - **Healthy Food Section** promoting organic food.
  - **Delivery & Payment Section** highlighting payment methods.
  - **Follow Us Section** with social media icons.
  - **Footer** with contact details.
- 

## □ Technologies Used

- **HTML5** for structure
  - **CSS3** for styling (custom CSS in `fooddelivery.css`)
  - **Bootstrap 4** for layout and responsiveness
  - **Font Awesome** for social media icons
-

## ❑ Project Structure

```
food-delivery-website/  
├── fooddelivery.html    # Main HTML file  
├── fooddelivery.css     # Custom styles
```

---

## ❑ How to Run

1. Clone or download this repository.
  2. Open fooddelivery.html in a web browser.
  3. Ensure you have internet access to load Bootstrap and Font Awesome from the CDN.
- 

## ❑ Future Improvements

- Add JavaScript for interactive features like live cart updates.
  - Connect with a backend to handle real orders.
  - Include a search and filter system for menu items.
-
